

SUGAR FREE DIET SNOW BALL SYRUP

Equivalent Sweetness Chart

For this much SUGAR	Use this much EQUAL
2 tsp.	1/4 tsp.
1 Tbsp.	3/8 tsp.
1/4 cup	1-1/2 tsp.
1/3 cup	2 tsp.
1 cup	2 Tbsp.
1 lb.	4-1/2 Tbsp.

Pack Size

EQUAL Bulk Pack is packaged in convenient one pound boxes, six boxes to a case.

Ingredients

Dextrose with Maltodextrin, Aspartame (NutraSweet brand).

Nutritional Information

Per teaspoon 4 gram	Carbohydrate . . . less than 4 gram
Calories 16 per teaspoon	Fat 0 gram
Protein 0 gram	Sodium 0 mg

Contains less than 2 percent of the US RDA of protein, vitamin A, vitamin C, thiamine, riboflavin, niacin, calcium and iron.

Phenylketonurics: Contains Phenylalanine

One pound will make approximately 2 gallons diet syrup

EQUAL
\$7.50 a Pound

4 ½ Tablespoons EQUAL + 25ml. flavor concentrate + water to prepare one-fifth bottle of diet snow ball syrup.

OPTIONAL: GUAR GUM Diet flavor thickener

4 ½ Tablespoons EQUAL + 1 Teaspoon (3 grams) GUAR GUM + 25ml. flavor concentrate + water to prepare one-fifth bottle diet snow ball syrup

One pound of GUAR GUM cost \$2.00 and will thicken 36 gallons of diet syrup.

SPECIAL MIXING INSTRUCTIONS FOR THE OPTIONAL GUAR GUM THICKENER RECIPE.

The **EQUAL BULK PACK** powder mixes easily. The **GUAR GUM** requires additional agitation and the proper amount added at one time per batch. After the water has been thickened and the thickened water will not receive additional **GUAR GUM**. The following instructions are for preparing a one-fifth bottle.

- Fill a one-fifth glass bottle to the bottom of the neck with room temperature water.
- Pour this water into an empty gallon jug.
- Measure 4 ½ tablespoons **EQUAL** in on teaspoon **GUAR GUM**. Add both powders to the same small dry container so that the two powders can be poured into the gallon jug quickly. Have a dry funnel available if necessary.
- Pour the two powders into the gallon jug. Put on the cap and shake vigorously immediately for 20 seconds.

- Pour the diet syrup base through a strainer to remove any **GUAR GUM** that did not dissolve. It is easiest to pour diet syrup base through a strainer on top of a funnel that is sending the liquid into the original one-fifth glass bottle.
- Add four-fifths ounce (25 ml.) of the desired flavor concentrate to complete the bottle of diet snow ball syrup.

Some snow ball outlets use less than the recommended amount of **EQUAL** with favorable results.
